

Table of Indicators

Introduction:

Indicators provide an annual statistical snapshot of the County, a snapshot which allows the County both to analyze positive and negative trends and to review and update policies which may have an impact on the trend's movement. The indicators included in the preliminary databook (chapter introductions) for the County were developed from indicator programs used in other jurisdictions, including the Raonoke Valley and Blacksburg, and from the State of Virginia's "Statewide Quality of Life Indicators" list.
